

**US Army Corps  
of Engineers®**  
Philadelphia District

## **PROJECT FACTSHEET**

### **Section 22 Planning Assistance to States, NY Upper Delaware River Basin (Callicoon Creek)**

April 2009

**CONGRESSIONAL DISTRICTS:** Reps. Hall (NY-19), Murphy (NY-20), Hinchey (NY-22)

**APPROPRIATION / PHASE:**  
General Investigations

**BUSINESS PROGRAM:**  
Watershed Planning

**AUTHORITY:** Section 22, Water Resources Development Act of 1974, as amended.

**LOCATION:** Upper Delaware River Basin, NY.

**DESCRIPTION:** Section 22 provides authority for the Corps of Engineers to assist states, local governments, and other non-Federal entities in the preparation of comprehensive plans for the development, use, and conservation of water and related land resources. The Corps of Engineers can provide technical study (not design or construction) assistance. Each study should be completed within one year. Limited funds are available nationwide; ten million dollars is annually funded for projects nationwide. Section 22 provisions limit funding to \$2,000,000 annually per state. The local sponsor provides half the study cost, and in-kind credit can be applied to 100% of that contribution.

A hydrology and hydraulic modeling study of the East Branch Callicoon Creek watershed area would be developed with the goal of facilitating flood reduction efforts. A scope of work and cost share agreement has been submitted to the sponsor and is being negotiated for concurrence.

**STATUS:** FY 08 funds in the amount of \$83,900 are being used to develop the study scope, execute a cost share agreement, and initiate the work effort. FY 09 funds will be used to complete the effort.
